By Electronic Team, Inc.

# Single Control Panel For USB Devices In The Network

FlexiHub is a **software as a service** for redirecting **all types of USB** devices over the network and **accessing remote USB devices over the Internet**. It is a subdivision of **Electronic Team, Inc.** and has remained the flagship product since it was presented in **2014**.

FlexiHub is a convenient software service for individuals, small teams, and major organizations that supports **all of the key connection protocols**:

- TCP/IP
- UDP
- RDP

Also, FlexiHub can be used to redirect **COM ports over Ethernet** (supported only by the Windows version).

# Benefits Offered By FlexiHub

- **Access USB devices remotely**

FlexiHub allows accessing USB or serial devices plugged into network computers listed as nodes. It does not matter where they are located physically - in the next cubicle or across the globe.

- **Connect and disconnect to USB and serial devices**

Not only you can access devices, you can also manage them remotely. Your physical presence is not required. It is totally safe to do it - thanks to use of encrypted communication protocol.

- **Detect device type automatically**

Once you insert a device, FlexiHub automatically detects its type and displays it - a phone, a storage device, a camera, etc. This makes it easier to identify what device you need to access. Serial devices are marked with a special indicator to differ them from USB devices.

- **Control access to devices**

You can restrict access to devices connected to your computer via USB or serial ports. Such devices will not be listed as accessible to other computers, and only authorized users will be able to access them.

## Highlights of the technology employed by FlexiHub:

- Unique sharing mechanism: USB or serial ports can be shared and accessed over network from anywhere.
- Secure data transfer: 2048-bit SSL encryption makes it completely safe to use the application.
- Private communication server: this means that your computers do not need a real IP address to share and access data.
- Data compression: this reduces traffic consumption and increases the speed of working with certain devices.
- Access control: you can restrict access to devices plugged into your local machine, so only authorized users can use it.

# Supported Operating Systems & Devices

FlexiHub is a **cross-platform service** that is capable of connecting USB devices between different operating systems:

- Windows: 7 SP1/8/8.1/10/11;
- Windows Server 2008 R2/2012/2012 R2/2016/2019/2022;
- Windows 10/11 on Arm;
- macOS: 10.14 or higher;
- Linux: tested with Ubuntu 18.04, 20.04; CentOS 8;
- Android 5.0 or higher;
- Raspberry Pi (Debian Stretch, Debian Buster, RPM-based Linux).

FlexiHub is a **driverless solution**—it does not require any device drivers installed on the local computer, i.e. the device type is detected automatically when connected to remote machines.

Therefore, FlexiHub supports almost all types of USB devices, including HID devices, peripherals, communication devices, computer equipment, microcontrollers, and many more.

Full list of supported devices can be viewed here: <https://www.flexihub.com/supported-devices/>

# FlexiHub Pricing

To know more about FlexiHub pricing, visit <https://www.flexihub.com/prices/>

## For Individuals

Personal subscription starts at \$14/month per one connection, a user may customize the plan and choose a number of connections.

## For Businesses

The Business subscription is intended for commercial use and is sold on a pay-as-you-go basis: a user purchases a fixed number of sessions to connect to the remote devices (starts at \$50/100 sessions). More info: <https://www.flexihub.com/business-plan/>

## For Teams

Team subscription starts at \$12/month per member. The team administrator can assign multiple team members within the Team account and set up the max number of connections for each of them, see: <https://www.flexihub.com/team-subscription/>

## For Enterprises

A custom Enterprise subscription for enterprise-level projects (price available upon request).
